A Closer Look at the Details that Make the Difference...

Hallmark Pro Series features a uniquely invisible tilt-in mechanism that eliminates unsightly tilt latches on the locking rail. This gives an uncluttered, classic look. This spring-loaded internal operator still allows sashes to tilt in for convenient cleaning from inside the home.

When properly used, AAMA certified night locks provide secure ventilation by permitting the sash to open a few inches.

These traditionally-styled die cast cam locks feature open and locked position, and are used to activate the hidden tilt feature.
